

## EN71-1,BS4569 Flammability Fabric Surface Flammability Tester

### Application

The surface flammability Tester commonly used in the examination down or the superficial knowledge fabric's flammability, the flame spreads fast in the fabric surface, but the fabric Kieb structure is incombustible.

### Technical parameters

Nozzle movement speed	150 millimeters/second +/-5 millimeter/seconds (bidirectional)
The nozzle moves the distance	More than or equal to 300 millimeter.
May test the fabric	0-70mm

plush altitude	
Flame altitude	0-60mm continuously adjustable
Volume	600mm*400mm*370mm
Weight	20kg
Power	AC220V± 10% 50Hz 50W
Meet standards	BS4569, EN71

Please revideo of the Surface Flammability Tester operation as below link:
