

QB/T 2920-2007 Brand New Mileage Tester With Standard Accessories

Product information

This machine is designed to determine the caster durability of luggage, which is rubbed against a coarse leather surface. Check the damage of casters after the luggage is being rubbed for a given stroke.

Technical Parameter

Miles Tester (Technical Specifications)

Input voltage specifications

Project	specifications
Voltage	single-phase AC220V ($\pm 5V$), 10A / 50HZ fuse
Frequency	input range: 50Hz

Technical requirements

Project	specifications
Test speed(KM))	0-5
Time memory	can display 0 ~ 99999 hours, power failure memory type
Pang slope	5mm / 8 / asymmetric configuration
Belt size	390 * 82cm (Switzerland HABASIT)
Auxiliary function bag angle	adjustment device (with set time automatically shut down)
Motor	AC variable frequency motor
Drive mode	electric drive
Test programming	1 to 10 paragraphs
Pause time	999 minutes can be set
Single-segment running time	9999 can be set
Operating load	50Kg
